Book Synopsis

Completely updated and expanded, the second edition of David Airey's "Logo Design Love" contains more of just about everything that made the first edition so great: more case studies, more sketches, more logos, more tips for working with clients, more insider stories, and more practical information for getting the job and getting it done right. In "Logo Design Love," David shows you how to develop an iconic brand identity from start to finish, using client case studies from renowned designers. In the process, he reveals how designers create effective brands, generate ideas, charge for their work, and collaborate with clients. David not only shares his personal experiences working on identity projects including sketches and final results of his own successful designs—he also uses the work of many well-known designers such as Paula Scher, who designed the logos for E! and Microsoft Windows, and Linden Labber, creator of the current FedEx identity, as well as work from leading design
